

I am a very happy XM / Satelitte Radio customer and I rely heavily on their Traffic & Weather reports.

My business - outside sales - takes place on the road and I've come to depend on their 24 hr traffic and weather reports. Relying on the regular radio channels to provide me with this information sporadically and in between all of the junk they broadcast is unacceptable.

I vehemently oppose any attempt on the part of the NAB to restrict XM's ability to provide this information. Tell them to mind their own business and do a better job in the future!
